Math Practice - Grade 7

M2 Multiply and divide rational numbers, decimals, four operations - Multi step problems with four operations

M2 7.NS.2, 7.NS.2a, 7.NS.2b, 7.NS.2c, 7.NS.2d, 7.NS.3

Name: _____ Date: _____

Work out the multi step problem. Write the answer in the box.

Example: (-6) / (-6) + (-7) = ?

How: Do the parentheses first, then multiply and divide, then add and subtract. Check the sign at each step before you move on.

-6

---

1 **(-12) / (-3) + 0 = ?**

---

2 **10 / (-2) + 3 = ?**

---

3 **-5.7 x 10 - (-3) = ?**

Math Practice - Grade 7

M2 Multiply and divide rational numbers, decimals, four operations - Multi step problems with four operations

M2 7.NS.2, 7.NS.2a, 7.NS.2b, 7.NS.2c, 7.NS.2d, 7.NS.3

Name: _____ Date: _____

Work out the multi step problem. Write the answer in the box.

Example: 8 / (-8) + (-7) = ?

How: Do the parentheses first, then multiply and divide, then add and subtract. Check the sign at each step before you move on.

-8

---

1 **(1/2 + 1/2) x 4 = ?**

---

2 **(-45) / (-5) + (-3) = ?**

---

3 **49 / (-7) + 3 = ?**

Math Practice - Grade 7

M2 Multiply and divide rational numbers, decimals, four operations - Multi step problems with four operations

M2 7.NS.2, 7.NS.2a, 7.NS.2b, 7.NS.2c, 7.NS.2d, 7.NS.3

Name: _____ Date: _____

Work out the multi step problem. Write the answer in the box.

Example: (-81) / 9 + (-9) = ?

How: Do the parentheses first, then multiply and divide, then add and subtract. Check the sign at each step before you move on.

-18

---

1 **4.4 x 10 - 2 = ?**

---

2 **(1/4 + 1/4) x 16 = ?**

---

3 **(1/2 + 1/2) x 4 = ?**
