Math Practice - Grade 7

M4 Percent and proportional problem solving - Two step percent problems

M4 7.RP.3

Name: _____ Date: _____

Read the story. Write the final total in the box.

Example: A coat costs 200. It is on sale for 20 percent off. Tax is 10 percent on the sale price. What is the final total?

How: Do one percent step at a time. A discount comes off the original price first, and the tax is then a percent of the discounted price, not of the original price.

Final total 176

---

1 **A coat costs 200. It is on sale for 50 percent off. Tax is 5 percent on the sale price. What is the final total?**

Final total ☐

---

2 **A coat costs 200. It is on sale for 20 percent off. Tax is 5 percent on the sale price. What is the final total?**

Final total ☐

---

3 **A coat costs 200. It is on sale for 50 percent off. Tax is 10 percent on the sale price. What is the final total?**

Final total ☐
